TRANSACTIONS OF THE AMERICAN MATHEMATICAL SOCIETY
INDEX, VOLUMES 201–214

This index includes Memoirs published during the period January 1975–December 1975

	Vol.	Pages
ADÁMEK, J. and REITERMAN, J. Fixed points in representations of categories	211	239–247
AKIN, ETHAN. Stiefel-Whitney homology classes and bordism	205	341–359
ALLDAY, CHRISTOPHER. Torus actions on a cohomology product of three odd spheres	203	343–358
ALLENBY, R. B. J. T. and TANG, C. Y. On the Frattini subgroups of generalized free products and the embedding of amalgams	203	319–330
ANDRE, PETER P. k-regular elements in semisimple algebraic groups	207	105–124
ANDREWS, GEORGE E. On the Alder polynomials and a new generalization of the Rogers-Ramanujan identities	204	40–64
ARENDT, B. D. On semisimple commutative semigroups	208	341–351
ARNOLD, D. M. and LADY, E. L. Endomorphism rings and direct sums of torsion free abelian groups	211	225–237
ASH, J. MARSHALL and GLUCK, LAWRENCE. Convergence and divergence of series conjugate to a convergent multiple Fourier series	207	127–142
BABCOCK, BRUCE S. On properties of the approximate Peano derivatives	212	279–294
BACHMAN, GEORGE, BECKENSTEIN, EDWARD, NARICI, LAWRENCE and WARNER, SETH. Rings of continuous functions with values in a topological field	204	91–112
BAILEY, KEITH D. Extending closed plane curves to immersions of the disk with n handles	206	1–24
BAJPAI, S. K., KAPOOR, G. P. and JUNEJA, O. P. On entire functions of fast growth	203	275–297
BARBOSA, JOÃO LUCAS MARQUES. On minimal immersions of S^2 into S^{2m}	210	75–106
BARNES, GEORGE R. and WHITLEY, ROBERT. The oscillation of an operator on L^p	211	339–351
BARTH, THEODORE J. Families of holomorphic maps into Riemann surfaces	207	175–187
BECKENSTEIN, EDWARD, NARICI, LAWRENCE, WARNER, SETH and BACHMAN, GEORGE. Rings of continuous functions with values in a topological field	204	91–112
BERGER, T. R. Hall-Higman type theorems. II	205	47–69
BERNDT, BRUCE C. Identities involving the coefficients of a class of Dirichlet series. VII	201	247–261
BERNSTEIN, LEON. Units and periodic Jacobi-Perron algorithms in real algebraic number fields of degree 3	212	295–306
BLAU, HARVEY I. Under the degree of some finite linear groups. II	203	87–96
BLEIER, ROGER and CONRAD, PAUL. a^*-closures of lattice-ordered groups	209	367–387
BLOCK, LOUIS. Diffeomorphisms obtained from endomorphisms	214	403–413

	Vol.	Pages
BLOOMBERG, EDWARD M. Manifolds with no periodic homeomorphisms	202	67–78
BOLAND, PHILIP J. Holomorphic functions on nuclear spaces.	209	275–281
BOORMAN, EVELYN HUTTERER. S-operations in representation theory	205	127–149
BOROSH, I. and FRAENKEL, A. S. A generalization of Jarník's theorem on diophantine approximations to Ridout type numbers	211	23–38
BOURGIN, RICHARD D. Approximate isometries on finite dimensional Banach spaces	207	309–329
BRANDAL, WILLY. On h-local integral domains	206	201–212
BRITTON, OTHA L. Primitive ideals of twisted group algebras.	202	221–241
BROWNAWELL, W. DALE. Gelfond's method for algebraic independence	210	1–26
BRUNEL, ANTOINE and SUCHESTON, LOUIS. On J-convexity and some ergodic super-properties of Banach spaces	204	79–90
BRYLAWSKI, TOM. Modular constructions for combinatorial geometries	203	1–44
BUNCE, JOHN W. and DEDDENS, JAMES A. C^*-algebras with Hausdorff spectrum	212	199–217
BURR, S. A., ERDÖS, P. and SPENCER, J. H. Ramsey theorems for multiple copies of graphs	209	87–99
BUSCHMAN, R. G. and SRIVASTAVA, H. M. Some polynomials defined by generating relations	205	360–370
CAHILL, ROTRAUT GAUBAU. On bounded functions satisfying averaging conditions. I	206	163–174
CAMBURN, MARVIN E. Local Jordan algebras	202	41–50
CARMIGNANI, ROBERT. Analytic continuation, envelopes of holomorphy, and projective and direct limit spaces	209	237–258
CARTWRIGHT, DONALD I. Extensions of positive operators between Banach lattices	Memoir No. 164	
CATTANEO, GIULIA MARIA PIACENTINI and HENTZEL, IRVIN ROY. Generalization of right alternative rings	207	143–161
CAYFORD, A. H. and STRAUS, E. G. On differential rings of entire functions	209	283–293
CEREZO, ANDRÉ. Equations with constant coefficients invariant under a group of linear transformations	204	267–298
CHAZIN, R. L. Stable thickenings in the homotopy category.	205	71–77
CHEN, KUO-TSAI. Iterated integrals, fundamental groups and covering spaces	206	83–98
CHEN, SU-SHING. Fuchsian manifolds	203	247–256
CHERENACK, PAUL. Submersive and unipotent group quotients among schemes of a countable type over a field k...	211	101–112
CHILD, JAMES D. Interpolation and uniqueness results for entire functions	209	199–209
CHILDS, LINDSAY N. The Brauer group of graded Azumaya algebras. II: Graded Galois extensions	204	137–160
CHOI, S. L. G., KOMLÓS, J. and SZEMERÉDI, E. On sum-free subsequences	212	307–313
CHOU, CHING. Weakly almost periodic functions and almost convergent functions on a group	206	175–200
CHOW, Y. S. and LAI, T. L. Some one-sided theorems on the tail distribution of sample sums with applications to the last time and largest excess of boundary crossings	208	51–72

	Vol.	Pages
CLANCEY, KEVIN F. On finite Hilbert transforms	212	347–354
CLARKE, FRANK H. Generalized gradients and applications	205	247–262
COHN, LESLIE. The dimension of spaces of automorphic forms on a certain two-dimensional complex domain	Memoir No. 158	
COIFMAN, R. R. and MEYER, YVES. On commutators of singular integrals and bilinear singular integrals	212	315–331
CONLON, LAWRENCE. Erratum to "Transversally parallelizable foliations of codimension two"	207	406
CONNOR, WILLARD G. Partition theorems related to some identities of Rogers and Watson	214	95–111
CONRAD, PAUL and BLEIER, ROGER. a^*-closures of lattice-ordered groups	209	367–387
CONWAY, JOHN B. On the Calkin algebra and the covering homotopy property	211	135–142
CRAVEN, THOMAS C. The Boolean space of orderings of a field	209	225–235
CRENSHAW, J. A. and KIRK, R. B. A generalized topological measure theory	207	189–217
CRISALLI, A. J. Theta constants and cusp forms	201	125–132
———, On differentials of the first kind and theta constants for certain congruence subgroups	211	71–84
CURTIS, C. W. Correction and additions to "On the degrees and rationality of certain characters of finite Chevalley groups"	202	405–406
CURTIS, W. D. The automorphism group of a compact group action	203	45–54
D'ARCHANGELO, JAMES and HARTMAN, PHILIP. Integration of ordinary linear differential equations by Laplace-Stieltjes transforms	204	245–266
D'ARISTOTLE, ANTHONY J. On the extension of mappings in Stone-Weierstrass spaces	208	91–101
DAVERMAN, ROBERT J. Wild spheres in E^n that are locally flat modulo tame Cantor sets	206	347–359
DAVIS, DONALD M. and MAHOWALD, MARK E. The geometric dimension of some vector bundles over projective spaces	205	295–315
DAY, K. MICHAEL. Toeplitz matrices generated by the Laurent series expansion of an arbitrary rational function	206	224–245
———, Measures associated with Toeplitz matrices generated by the Laurent expansion of rational functions	209	175–183
DEDDENS, JAMES A. and BUNCE, JOHN W. C^*-algebras with Hausdorff spectrum	212	199–217
DETEMPLE, DUANE W. Further generalizations of the Nehari inequalities	205	333–340
DODDS, P. G. Sequential convergence in the order duals of certain classes of Riesz spaces	203	391–403
———, o-weakly compact mappings of Riesz spaces	214	389–402
DODDS, THERESA K. Y. CHOW. Fatou properties of monotone seminorms on Riesz spaces	202	325–337
DUDLEY, E. The Gaussian law and the law of the iterated logarithm for lacunary sets of characters	214	187–214
DUNKL, CHARLES F. and RAMIREZ, DONALD E. A family of countably compact P_*-hypergroups	202	339–356

	Vol.	Pages
DUNN, JOSEPH L. A sufficient condition for hyperbolicity of partial differential operators with constant coefficient principal part	201	315–327
DUSKIN, J. Simplicial methods and the interpolation of "triple cohomology"	Memoir No. 163	
DYER, MICHEAL N. On the 2-realizability of 2-types	204	229–243
DYER, MICHEAL N. and SIERADSKI, ALLAN J. Trees of homotopy types of 2-dimensional CW complexes. II	205	115–125
EDMONDS, ALLAN L. Deformations of group actions	201	147–160
EDWARDS, DAVID A. and GEOGHEGAN, ROSS. The stability problem in shape, and a Whitehead theorem in pro-homotopy	214	261–277
EIFLER, LARRY Q. Some open mapping theorems for marginals	211	311–319
ELLIOTT, GEORGE A. Finite projections in tensor product von Neumann algebras	212	47–60
ENGBER, MICHAEL. Teichmüller spaces and representability of functors	201	213–226
ENGLE, JESSIE ANN. A 5-*R* uniqueness theorem	201	89–104
EPSTEIN, RICHARD L. Minimal degrees of unsolvability and the full approximation construction	Memoir No. 162	
ERDÖS, P., SPENCER, J. H. and BURR, S. A. Ramsey theorems for multiple copies of graphs	209	87–99
EVENS, LEONARD. The spectral sequence of a finite group extension stops	212	269–277
FEISSNER, GEORGE F. Hypercontractive semigroups and Sobolev's inequality	210	51–62
FIALKOW, L. A. The similarity orbit of a normal operator	210	129–137
FISCHER, J. The subgroups of a tree product of groups	210	27–50
FRAENKEL, A. S. and BOROSH, I. A generalization of Jarník's theorem on diophantine approximations to Ridout type numbers	211	23–38
FRANKFURT, RICHARD. Spectral analysis of finite convolution operators	214	279–301
FRIEDMAN, AVNER and PINSKY, MARK A. Acknowledgement of priority	203	405
FRIEDMAN, HARVEY. Large models of countable height	201	227–239
FUELBERTH, JOHN and KUZMANOVICH, JAMES. The structure of semiprimary and Noetherian hereditary rings	212	83–111
FUERTES, C. and NAVEIRA, A. M. The zeros of nonnegative holomorphic curvature operators	210	139–147
GAGRAT, M. S. and THRON, W. J. Nearness structures and proximity extensions	208	103–125
GARG, K. M. On bilateral derivates and the derivative	210	295–329
GAUDARD, MARIE A. and WEAVER, ROBERT J. Finitary imbeddings of certain generalized sample spaces	207	293–307
GAUGER, MICHAEL A. Duality theories for metabelian Lie algebras. II	203	67–75
GEMAN, DONALD and HOROWITZ, JOSEPH. Polar sets and Palm measures in the theory of flows	208	141–159
GEOGHEGAN, ROSS and EDWARDS, DAVID A. The stability problem in shape, and a Whitehead theorem in pro-homotopy	214	261–277

	Vol.	Pages
GERBER, LEON. Associated and perspective simplexes	201	43–55
GILMAN, ROBERT and GORENSTEIN, DANIEL. Finite groups with Sylow 2-subgroups of class two. I	207	1–101
——— Finite groups with Sylow 2-subgroups of class two. II	207	103–126
GLASNER, MOSES. Comparison theorems for bounded solutions of $\Delta u = Pu$	202	173–179
GLUCK, LAWRENCE and ASH, J. MARSHALL. Convergence and divergence of series conjugate to a convergent multiple Fourier seriesk	207	127–142
GOODEARL, K. R. Global dimension of differential operator rings. II	209	65–85
GORDON, WILLIAM B. Conservative dynamical systems involving strong forces	204	113–135
GORENSTEIN, DANIEL and GILMAN, ROBERT. Finite groups with Sylow 2-subgroups of class two. I	207	1–101
———. Finite groups with Sylow 2-subgroups of class two. II	207	103–126
GOSSELIN, J. A. and YOUNG, W. S. On rearrangements of Vilenkin-Fourier series which preserve almost everywhere convergence	209	157–174
GOTTLIEB, ALLAN. Converses to the Ω-stability and invariant lamination theorems	202	369–383
GOWRISANKARAN, K. Iterated nontangential limits	212	401–402
GRAHAM, IAN. Boundary behavior of the Carathéodory and Kobayashi metrics on strongly pseudoconvex domains in $\mathbf{C}^n$ with smooth boundary	207	219–240
GREEN, WILLIAM L. Topological dynamics and C^*-algebras	210	107–121
GREENE, WILLIAM A. Projective limits in harmonic analysis	209	119–142
GROSSMAN, JERROLD W. A homotopy theory of pro-spaces	201	161–176
GRUMAN, LAWRENCE. The zeros of holomorphic functions in strictly pseudoconvex domains	207	163–174
GULLIVER, ROBERT. On the variety of manifolds without conjugate points	210	185–201
GURGANUS, KENNETH R. Φ-like holomorphic functions in C^n and Banach spaces	205	389–406
HAGGARTY, R. J. A generalisation of supersoluable groups	209	433–441
HAGLER, JAMES. On the structure of S and $C(S)$ for S dyadic	214	415–428
HALPERN, HERBERT. Quasi-equivalence classes of normal representations for a separable C^*-algebra	203	129–140
HANDELMAN, DAVID and LAWRENCE, JOHN. Strongly prime rings	211	209–223
HARDT, ROBERT M. Topological properties of subanalytic sets	211	57–70
HARTFIEL, D. J. Results on measures of irreduciblity and full indecomposability	202	357–368
HARTMAN, PHILIP. Infinite convolutions on locally compact Abelian groups and additive functions	214	215–231
HARTMAN, PHILIP and DARCHANGELO, JAMES. Integration of ordinary linear differential equations by Laplace-Stieltjes transforms	204	245–266

	Vol.	Pages
HAUSEN, JUTTA. On automorphism groups and endomorphism rings of abelian p-groups	210	123–128
HAWKES, TREVOR O. Two applications of twisted wreath products to finite soluble groups	214	325–335
HAZELWOOD, D. G. On sums over Gaussian integers	209	295–310
HEIN, W. A construction of Lie algebras by triple systems	205	79–95
HEISEY, RICHARD E. Partitions of unity and a closed embedding theorem for (C^p, b^*)-manifolds	206	281–294
——— Manifolds modelled on R^∞ or boundary weak-* topologies	206	295–312
HELTON, JON C. Mutual existence of product integrals in normed rings	211	353–363
HENLE, MICHAEL. Binomial enumeration on dissects	202	1–39
HENTZEL, IRVIN ROY and CATTANEO, GIULIA MARIA PIACENTINI. Generalization of right alternative rings	207	143–161
HLAVKA, JAMES L. Results on sums of continued fractions	211	123–134
HOFMAN, KARL HEINRICH and MISLOVE, MICHAEL. On the fixed point set of a compact transformation group with some applications to compact monoids	206	137–162
HOLMES, RICHARD B., SCRANTON, BRUCE E. and WARD, JOSEPH D. Uniqueness of commuting compact approximations	208	330–340
HOROWITZ, JOSEPH and GEMAN, DONALD. Polar sets and Palm measures in the theory of flows	208	141–159
HOROWITZ, ROBERT D. Induced automorphisms on Fricke characters of free groups	208	41–50
HOWARD, F. T. Polynomials related to the Bessel functions	210	233–248
HUSCH, L. S. and ROW, W. H. One-dimensional polyhedral irregular sets of homeomorphisms of 3-manifolds	202	299–323
HUTCHINSON, GEORGE. On the representation of lattices by modules	209	311–351
HUTTON, C. V. p-factorable operators	205	167–180
ILLMAN, SÖREN. Equivariant singular homology and cohomology I	Memoir No. 156	
ITOH, T. and OGIUE, K. Isotropic immersions and Veronese manifolds	209	109–117
JACOBS, JOHN B. Necessary conditions for isomorphism of Lie algebras of Block	208	73–79
JAIN, NARESH C. and MARCUS, MICHAEL B. Integrability of infinite sums of independent vector-valued random variables	212	1–36
JOHNSON, CHARLES R. Inequalities for a complex matrix whose real part is positive definite	212	149–154
JOHNSON, DARELL J. The trigonometric Hermite-Birkhoff interpolation problem	212	365–374
JONES, MICHAEL R. A property of finite p-groups with trivial multiplicator	210	179–183
JUNEJA, O. P., BAJPAI, S. K. and KAPOOR, G. P. On entire functions of fast growth	203	275–297
KALLENBERG, OLAV. On symmetrically distributed random measures	202	105–121
KAPOOR, G. P., JUNEJA, O. P. and BAJPAI, S. K. On entire functions of fast growth	203	275–297

	Vol.	Pages
KARLIN, SAMUEL. Interpolation properties of generalized perfect splines and the solutions of certain extremal problems. I	206	25–66
KARLOF, JOHN. The subclass algebra associated with a finite group and subgroup	207	329–341
KATSARAS, A. Spaces of vector measures	206	313–328
——— Absolutely continuous functions on idempotent semigroups in the locally convex setting	206	329–337
KAUFFMAN, ROBERT, M. Polynomials and the limit point condition	201	347–366
KEARTON, C. Presentation of n-knots	202	123–140
——— Blanchfield duality and simple knots	202	141–160
KECHRIS, ALEXANDER S. The theory of countable analytical sets	202	259–297
KIRK, R. B. and CRENSHAW, J. A. A generalized topological measure theory	207	189–217
KLEIN, ABRAHAM, A. PI-algebras satisfying identities of degree 3	201	263–277
KLEITMAN, D. J. and ROTHSCHILD, B. L. Asymptotic enumeration of partial orders on a finite set	205	205–220
KOMLOŚ, J., SZEMERÉDI, E. and CHOI, S. L. G. On sum-free subsequences	212	307–313
KOVACIC, J. On the inverse problem of Galois theory	207	375–390
KREIMER, H. F. Automorphisms of commutative rings	203	77–85
KROONENBERG, NELLY and WONG, RAYMOND, Y. T. Unions of Holbert cubes	211	289–297
KURTZ, THOMAS G. Erratum to "Convergence of sequences of semigroups of nonlinear operators with an application to gas kinetics"	209	442
KUZMANOVICH, JAMES and FUELBERTH, JOHN. The structure of semiprimary and Noetherian hereditary rings	212	83–111
KWUN, KYUNG WHAN and TOLLEFSON, JEFFREY L. PL involutions of $S^1 \times S^1 \times S^1$	203	97–106
LADY, E. L. and ARNOLD, D. M. Endomorphism rings and direct sums of torsion free abelian groups	211	225–237
LAI, T. L. and CHOW, Y. S. Some one-sided theorems on the tail distribution of sample sums with applications to the last time and largest excess of boundary crossings	208	51–72
LAISON, DIANE and LAISON, GARY. Topological dynamics on C^*-algebras	204	197–205
LAISON, GARY and LAISON, DIANE. Topological dynamics on C^*-algebras	204	197–205
LALLEMENT, GERARD. Amalgamated products of semigroups: The embedding problem	206	375–394
LAMBEK, J. and RATTRAY, B. A. Localization and sheaf reflectors	210	279–293
LAWRENCE, JOHN and HANDELMAN, DAVID. Strongly prime rings	211	209–223
LAWSON, TERRY C. Splitting isomorphisms of mapping tori.	205	285–294
LAX, R. F. On the dimension of varieties of special divisors.	203	141–159
LEACH, RONALD J. On some classes of multivalent starlike functions	209	267–273
LEE, CHUNG-NIM and WASSERMAN, ARTHUR G. On the groups $JO(G)$	Memoir No. 159	

	Vol.	Pages
LEECH, JONATHAN. Two papers: H-coextensions of monoids and The structure of a band of groups	Memoir No. 157	
LEHRER, G. I. Adjoint groups, regular unipotent elements and discrete series characters	214	249–260
LEPOWSKY, J. On the Harish-Chandra homomorphism	208	193–218
——— Conical vectors in induced modules	208	219–272
LERON, URI. Nil and power-central polynomials in rings	202	97–103
LEUNG, K.-K. and LINDEN, C. N. Asymptotic values of modulus 1 of Blaschke products	203	107–118
LEUNG, KAR-KOI. Asymptotic values of modulus 1 of functions in the unit ball of H^∞	203	119–128
LEVINSON, H. Decomposable braids as subgroups of braid groups	202	51–55
LEVITT, NORMAN. Exotic singular structures on spheres	205	371–388
LIBERA, RICHARD J. and LIVINGSTON, ALBERT E. Weakly starlike meromorphic univalent functions	202	181–191
LINDEN, C. N. and LEUNG, K. K. Asymptotic values of modulus 1 of Blaschke products	203	107–118
LIPSHITZ, L. Commutative regular rings with integral closure.	211	161–170
LIPSCOMB, STEPHEN LEON. On imbedding finite-dimensional metric spaces	211	143–160
LIU, MING-CHIT. Simultaneous approximation of additive forms	206	361–373
LIU, TAI-PING. Existence and uniqueness theorems for Riemann problems	212	375–382
LIVINGSTON, ALBERT E. and LIBERA, RICHARD J. Weakly starlike meromorphic univalent functions	202	181–191
LLOYD, JOHN. Smooth locally convex spaces	212	383–392
LOCKER, JOHN. On constructing least squares solutions to two-point boundary value problems	203	175–183
LOEB, PETER A. Conversion from nonstandard to standard measure spaces and applications in probability theory	211	113–122
LOTZ, HEINRICH P. Extensions and liftings of positive linear mappings on Banach lattices	211	85–100
LUCAS, DEAN. Weak maps of combinatorial geometries	206	247–279
LUM, LEWIS. Weakly smooth continua	214	153–167
MACRAE, R. E. On the two sheeted coverings of conics by elliptic curves	211	277–287
MAHARAM, DOROTHY. On smoothing compact measure spaces by multiplication	204	1–39
MAHOWALD, MARK. On the double suspension homomorphism	214	169–178
MAHOWALD, MARK E. and DAVIS, DONALD M. The geometric dimension of some vector bundles over projective spaces	205	295–315
